

# K 5600<sup>®</sup>

L I G H T I N G

## ADDING VERSATILITY TO YOUR K5600 PRODUCTS.

### MULTIBUG

The **MULTIBUG** is an accessory which allows to fit easily 4 Joker-Bugs (200,400 or 800 W) in an Octaplus or any size Video Pro banks. It was designed after the need expressed by end users to have a more powerful and even output from light banks.

### BUG-A-BEAM 800

The **BUG A BEAM 800** : Following the success of the Bug A Beam adapter for the 400 W, we have been asked by many users to make it available for a more powerful unit. This time, it comes as a system with the rear end of a Source 4 Standard as the glass mirror has to be rectified to allow the 800 W bulb diameter to fit through. This Bug A Beam 800 System is not applicable to the Junior series but would fit any of the Standard range of Source Fours.

### JOKER-BUG 1Kw

The **JOKER BUG 1 Kw** is an incandescent version of the joker bug HMI family. The Joker Bug 1K is a Bug 400 body and an 800 W beamer enabling the Softube 800 to be used as well with this 1 Kw Tungsten version.

### BUG-LITE 2Kw

The **BUG 2 Kw** is ideal for all light banks, Spring balls, lanterns... without the noise of dimmed filament but with absolute safety. The borosilicate safety glass is topped with a safety wire cover for extra protection.

### SPACEBEAM

The **SPACE BEAM** is an accessory to the Alpha 4K V2. It turns the Alpha 4K into a Spacelight or Hyperspot narrow beam in seconds. The Spacebeam is foldable.
